

Here's a properly formatted version of the dataset for a Retrieval-Augmented Generation (RAG)-based model. Each question-answer pair is clearly labeled for better structuring and processing:

---

## Dataset for RAG-Based Model:

### Customer Service

**Input:** Customer Service

**Output:**

- Dialing: 198 (common for complaints).

- Emailing: [support@provider.com](mailto:support@provider.com).
  - Live chat: Use the provider's app or website.
- 

## Porting a Number

**Input:** How do I port my number to another provider?

**Output:**

- Generate a porting request code (e.g., send "PORT").
  - Submit it to your new provider.
  - Follow instructions provided by both providers for seamless transfer.
- 

## Mobile Hotspot Setup

**Input:** How do I set up a mobile hotspot?

**Output:**

- Go to your phone's *Settings > Network & Internet > Hotspot & Tethering*.
  - Turn on the mobile hotspot and set a password.
  - Connect other devices using the hotspot name and password.
-

## Lost SIM Card

**Input:** What should I do if my SIM card is lost?

**Output:**

1. Call customer support immediately to block your SIM.
  2. Visit your provider's store with ID proof to get a replacement.
  3. Activate the new SIM.
- 

## Upgrading to 5G

**Input:** Can I upgrade from 4G to 5G?

**Output:**

- Yes, if:
    1. You have a 5G-enabled device.
    2. You are in a 5G coverage area.
    3. Your current plan supports 5G (or upgrade to a 5G plan).
- 

## Services Offered by Telecom Providers

**Input:** What services do telecom providers offer?

**Output:**

- Mobile and broadband internet.
  - Voice calls and SMS.
  - Cloud and IoT solutions for businesses.
  - Entertainment services (e.g., streaming apps, music subscriptions).
- 

## Checking 5G Compatibility

**Input:** How do I check if my phone supports 5G?

**Output:**

- Check your phone's specifications in the settings or online.
  - Confirm with your telecom provider.
  - Ensure your SIM card and plan support 5G.
- 

## Voicemail Setup

**Input:** How can I set up voicemail on my phone?

**Output:**

1. Dial your voicemail number (e.g., 123).

2. Follow the voice prompts to record your greeting.
  3. Set a PIN for security.
- 

## Blocking Spam Calls

**Input:** How do I block spam calls and messages?

**Output:**

- Enable DND (Do Not Disturb) via your provider's app or website.
  - Use call-blocking apps (e.g., Truecaller).
  - Block individual numbers directly from your phone.
- 

## Student Discounts

**Input:** Are there any student discounts?

**Output:**

- Yes, many providers offer student discounts, such as:
  1. Unlimited 4G data at reduced prices.
  2. Free access to streaming services (e.g., Spotify, Netflix).
- Check with your provider for specific offers.

---

## Family Plans

**Input:** What family plans do you offer?

**Output:**

- **USA:** AT&T Family Plan: \$150/month for 4 lines, unlimited 5G data.
- **India:** Airtel Family Plan: ₹999/month for 3 users, 150 GB shared data.
- **UK:** Vodafone Red Family Plan: £50/month, unlimited data for 2 users.

---

## Cheaper Plans

**Input:** How can I switch to a cheaper plan?

**Output:**

1. Log into your provider's app or website.
2. Go to the "Change Plan" section.
3. Choose the desired plan and confirm the switch.  
**Note:** Plan changes usually take effect in the next billing cycle.

---

## Broadband Speed

**Input:** What is the average speed of your broadband services?

**Output:**

- **4G Broadband:** 20–50 Mbps.
  - **5G Broadband:** 100 Mbps to 1 Gbps.
  - **Fiber Broadband:** Up to 10 Gbps (e.g., Google Fiber).
- 

## Wi-Fi Router Setup

**Input:** How do I set up a Wi-Fi router at home?

**Output:**

1. Connect your router to the modem using an Ethernet cable.
  2. Power on the router and wait for the indicator lights.
  3. Log into the router's admin panel using the IP address (e.g., 192.168.1.1).
  4. Configure the network name (SSID) and password.
- 

## Wi-Fi Issues

**Input:** Why is my Wi-Fi not working?

**Output:**

- Weak signal or interference.

- Incorrect router settings.
- Service outage in your area.

**Tip:** Restart your router or contact customer support.

---

## International Usage

**Input:** How can I use my phone while traveling abroad?

**Output:**

- Activate international roaming (via app or USSD).
  - Use a local SIM card in the destination country.
  - Purchase an international travel pack (e.g., \$15/day for unlimited calls and data).
- 

## International Call Charges

**Input:** What are the charges for international calls?

**Output:**

- **USA to India:** \$0.05/min.
  - **UK to EU:** £0.10/min.
  - Consider VoIP services (e.g., WhatsApp, Skype) for cheaper alternatives.
-

## Reactivating Deactivated Numbers

**Input:** What should I do if my number is deactivated?

**Output:**

1. Visit your provider's nearest store with ID proof.
  2. Pay any pending dues.
  3. Reactivation typically takes 24–48 hours.
- 

## Data Management

**Input:** How can I reduce my data usage?

**Output:**

- Tips to save data:
  1. Limit background app refresh.
  2. Use Wi-Fi for streaming and downloads.
  3. Monitor data usage through your phone or provider's app.
